4 MS. BARRITT: My name is Marion Barritt,

5 M-a-r-i-o-n; B-a-r-r-i-t-t.

6 MS. BARRITT: I am very much against storing
7 nuclear fuel in Yucca Mountain in Nevada, partly because
8 it is close to a very populated area -- 100 miles away
9 from Las Vegas -- partly because I think it's in an area
10 that is subject to earthquakes.

11 I don't think we can guarantee that it will be
12 safe there for thousands of years, so I am considering not
13 just our generation, but future generations when I talk
14 about it being unsafe.

15 I worry also about transportation issues,
16 transporting it from other states, considering some of the
17 transportation problems that we have seen over the past
18 ten years with chemical loads and trucks and railroad
19 cars. So, I don't think we can guarantee that it will be
20 safely transported through numerous states to Nevada.

21 I am upset that Nevada is really the only state
22 that was considered for storage. I think there are a lot
23 of other states that have more open space than we do --
24 Texas being one of them, having driven through there
25 numerous times. I guess I'm negative on it.

1 MR. WARD: Is that it, then?

2 MS. BARRITT: I don't want to see the nuclear

3 waste stored in Nevada, period.
